SOFTWARE ENGINEER SUMMARY

- 2 years experience in designing/building user friendly UI, Applications and Websites
- Open to and skilled in a variety of Front End Web Developer and Back End technologies
- Curious about new technologies and aspire to combine usability with visual design

WORK EXPERIENCE

SOFTWARE ENGINEER

May 2020-Present

Technologica

Building the client-side and server-side of a booking web application complete with outside APIs. Provided and implemented a working draft of the site in the span of 1 month. Currently guaranteeing cross browser and multiple device compatibility.

SOFTWARE ENGINEER

September 2019-May 2020

UltimumIT

Updated legacy SAP risk analysis software so that the application could transition from personal use to commercial. Converted the software from a React web application to an Electron desktop application.
